# Product Overzicht 2025 Video Security

**SMART Line serie** 

GRUNDIG

# What can you expect from the SMART product line from GRUNDIG Security?

Leaving our tried and tested reliability aside, you will also find a whole lot of image analysis functions, supported by artificial intelligence (AI). And there's a lot of functionality available. You can use facial recognition, for instance, to recognise people, or the LPR function to identify vehicle licence plates. Or you can quite simply reduce the frequency of false alarms signalling a spurious break-in or perimeter breach, by classifying objects as 'vehicle', 'person' or 'other'.

The SMART cameras from GRUNDIG Security can recognise faces in crowds of people, count heads and determine the length of queues at your supermarket till, therefore helping you to make the best possible use of your resources. They'll let you know when unauthorised people cross pre-defined lines or enter certain areas, and they'll trigger an alarm when objects are left at your doorstep.

These are just a few examples out of a plethora of possibilities which the exceptionally flexible SMART line products from GRUNDIG Security are able to offer.

So, if you want more than just pretty pictures and long recording times, please get in touch.

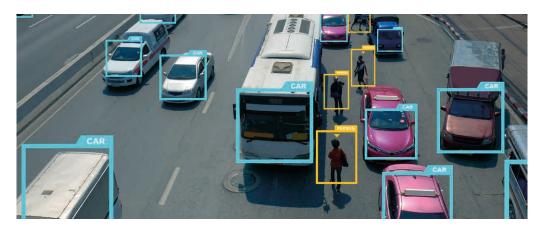

We look forward to hearing from you!

### **Classify persons & vehicles**

The GRUNDIG Security Smart Line cameras allow for clear classification of people and vehicles. This enables users, e.g. control centre operators, to define alarm events and responses even more precisely. The bidirectional audio function also allows direct communication with people on site.

### **Identify licence plates**

The licence plate recognition function enables reliable and automated access control, for example on a company's premises. The legitimisation of the respective vehicle is regulated via black and white lists.

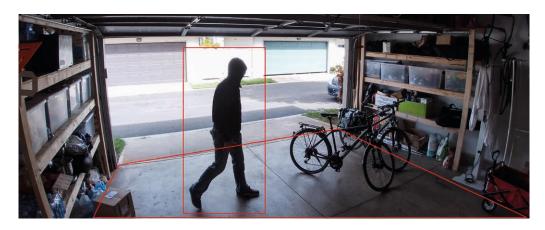

### **Identify faces**

As soon as a face is recognised, alarm information, including attributes such as gender and age, is reported. The data is compared with the database: If the face is not stored in the database, it is recognised as "unknown". Wearing a face mask can also be defined as a recognition attribute.

### GRUNDIG

### **Enter area**

The "enter area" detection function allows the precise definition of areas. As soon as someone enters the defined area, an alarm message is triggered. The moving object is classified as a person, motorised or non-motorised vehicle. Four different customisable rules are available for the alarm response.

### Manage queues

An alarm will be triggered as soon as a queue reaches a certain length. Alternatively, this function can be used to trigger an event by exceeding a certain dwell time.

### **Detect left/removed objects**

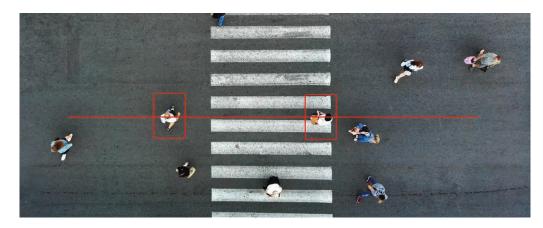

The "left/removed objects" detection function offers two usage options: objects located in a predefined area can be quickly identified. The function can also be used to detect the removal of any objects in this area.

### **Use Heat Map**

The heat map function facilitates the identification of areas where people prefer to stay or which are less frequented.

### **Cross lines**

If "Line crossing" is activated, crossing a previously defined line triggers an alarm message. The corresponding object is classified as a person, motorised or non-motorised vehicle. Four different customisable rules are available for the alarm response.

### **Analyse crowds**

An alarm is triggered as soon as the set number of people in a predefined area is exceeded. An acoustic message can also be emitted.

### **Count people/objects**

The "people/object counting" analysis function reliably counts people, moving objects as well as motorised or non-motorised vehicles, also in two different directions. By means of powerful reports, the collected data can be evaluated for further use.

### **Detect unusual noises**

This audio analysis function detects unusual noises such as barking dogs, baby crying and gunshots, thereby triggering an alarm. The sensitivity of this function can be adjusted infinitely.

# THE GSVM APP BY GRUNDIG SECURITY: INSTALLED AND CONFIGURED IN NO TIME

The GSVM app is a surveillance application for mobile phones and tablets.

The Mobile Software App has been designed to help small businesses effectively operate and manage security devices from anywhere and at anytime.

The power to view live images, play back footage, and receive notifications remotely keeps owners and operators in touch with their business, even when away.

- Real-time video preview of up to 16 channels
- Live control of PTZ Cameras
- Remote configuration of connected devices
- Display the cause of alarm triggering
- Push alarm notification
- Snapshot function
- Integration of devices via P2P cloud and IP-address

### THE SMART LINIE FROM GRUNDIG **SECURITY: NDAA COMPLIANT**

NDAA is the abbreviation for the National Defense Authorization Act. The John S. McCain National Defense Authorization Act (NDAA) for Fiscal Year 2019 was signed into law on August 13, 2018 and effective from August 2020.

The law, specifically Section 889, prohibits federal agencies, their contractors and grant or loan recipients from procuring or using "telecommunications and video surveillance equipment or services" from specific Chinese companies as a "substantial or essential component of any system, or as critical technology as part of any system."

The SMART product line from GRUNDIG Security complies with the requirements of this law.

### Smart-Managed PoE Switches

### CONFIGURATION AND MANAGEMENT THROUGH GU-SW-VMS

The configuration and management of the Smart-Managed PoE switches can be conveniently handled through the free software GU-SW-VMS from GRUNDIG Security. The software is also compatible with all other devices of the SMART product line from GRUNDIG Security.

- Integration of SMART line cameras and recorders
- Device management and recording
- Freely configurable views
- Comprehensive AI event search function
- Local recording of signals from all connected devices
- Live image display and playback of recorded images and video sequences
- Remote configuration of connected SMART line devices
- Al database management, e. g. face recognition
- Embedding of images, floor plans, and/or maps

### SC500AI WIDESCREEN SMART IMAGE SENSOR FOR 5 MEGAPIXEL CAMERAS

Traditional aspect ratio

Often accompanied by black borders and distortion

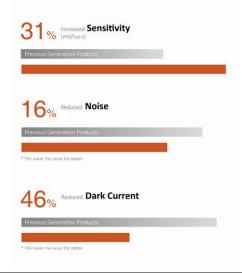

Limit your vision

### SC500AI

-16:9

Go beyond the scope of human vision Broaden your horizon It's an eye-opener

With the innovative SC500Al Widescreen Smart Image Sensor for all 5 megapixel cameras in our NDAA-compliant SMART product line, GRUNDIG Security enhances the visual experience on modern LCD displays, bridging the gap between image output and natural human vision.

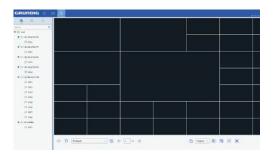

Thanks to SmartClarity Technology, the SC500AI sensor increases the number of pixels by 20% compared to many 5MP products on the market. Instead of cropping a 5MP 4:3 image down to 4 megapixels, the full resolution of the sensor is utilized to achieve a true 16:9 aspect ratio with 1620P.

This effectively reduces dark edges and distortion on both sides of the image caused by uneven scaling while achieving a true 16:9 aspect ratio with an additional 10% horizontal viewing area.

The SC500Al sensor boasts improved sensitivity and reduced noise, even under high-temperature conditions, thanks to the unique SFCPixel® technology.

The PixGain® technology also enables excellent High Dynamic Range (HDR) performance, even under glaring sunlight.

# Structure and composition of the GRUNDIG Security article numbers

## **5 years Extended Guarantee**

GRUNDIG Security offers a 5-year guarantee on all "SMART", "PRO" and "PREMIUM" series' cameras. Our goal:tofurther supportour customers by making project maintenance easier and more cost-effective. The 5-year guarantee applies to all electronic components of the products mentioned above. Mechanical wear and tear on moving parts is not included. Please refer to our general terms and conditions.

### GRUNDIG

### OUR AMBITION: THE PURSUIT OF A MORE SUSTAINABLE FUTURE

A holistic approach to sustainability and respect for all natural resources belong to our top priorities and are therefore an essential part of our DNA. This is also reflected in our products: they work as sustainably as possible while meeting the highest standards as regard to quality and aesthetics. During production, we consider the environment as much as possible, and we are always looking for ways to incorporate the idea of sustainability into our products.

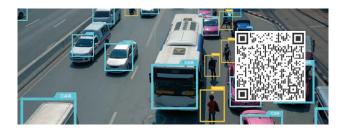

### **Environmentally friendly packaging**

Our environmentally friendly packaging with less colour print is made from 100% recyclable material. To save resources, our detailed operating instructions are available online for download. The quick reference guides that come with the devices are printed on 100% recycled paper. In addition, our mostly fanless devices are distinguished by their low power consumption, which reduces the cost of electricity consumption.

### **Identify licence plates**

**Classify persons & vehicles** 

**Identify faces** 

**Enter area** 

### Scan the QR-code and see the AI functions of the smart product line in action!

**Detect unusual noises: Dog Barking** 

**Detect unusual noises: Baby Crying** 

**Detect unusual noises: Gunshot** 

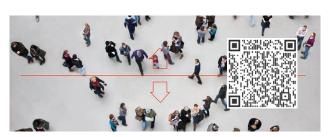

Manage queues

**Analyse crowds** 

**Count people/objects** 

**Use Heat Map**
