

SC-VCPD0603M, 3 channel coaxial video transmission system, is composed of SC-VTPD0603M (Transmitter) and SC-VRPD0603M (Receiver). It transmits three different video signals and supplies power to each camera over one coaxial cable. Also this device transmits RS-485 data over the same coaxial cable. This is a cost-saving solution and easy installation system.

Features

- 3 CH "video+power+data" transmission over 1 coaxial cable
- Long distance transmission up to 150M (With RG-59/U)
- Excellent noise isolation features
- Possible to extend the transmission distance by using repeaters
- Bi-directional communication data (RS-485 Simplex duplex)
- No need of power wiring & save infrastructure cost
- Installation improvement (cost saving 30~50%)
- Auto diagnosis for cable status and safe power supply
